The Central Health Board (CHB) has released its news bulletin for October 2012

Vitamin D also known as the sunshine vitamin is an essential fat soluble vitamin necessary for bone health and a number of functions in the human body. Vitamin D is perhaps the single most underrated nutrient in the world of nutrition. That's probably because it's free: your body makes it when sunlight touches your skin. Drug companies can't sell you sunlight, so there's no promotion of its health benefits. Truth is, most people don't know the real story on vitamin D and health.
